

The VAP Feedback Form is used to collect direct feedback from each session in order to analyze, monitor and ultimately improve the effectiveness of the program as a whole. This ensures that Kito Canada can provide the highest quality of instruction and material possible that is current with ongoing changes in the workplace.

## Hoist Safety & Repair Training

Where safety meets performance

# Hoist Safety & Repair Training

Where safety meets performance

Developed to add value to our customers by providing instruction, technical support, and safety awareness- Kito's Hoist Safety & Repair Training sessions have been embraced by chain hoist users for many years. We can conduct any of the sessions described below at your facility to accommodate your schedule. When you receive training, not only will you gain awareness of the practices of hoist safety, you will also increase your work performance and efficiency.

Call us today, or register online to arrange any of the following sessions:

## Chain Hoist Orientation Session (SOS)

### Option 1: Lever / Manual Hoists

Gain a heightened sense of awareness for lever and manual chain hoist safety. Learn inspection techniques, how hoist design can impact user safety, and how to ensure the correct safety procedures are in place.

### Option 2: Powered Hoists

This session covers all aspects of safe use and inspection of powered chain hoists. Learn inspection techniques, how hoists design can impact user safety, and how to ensure the correct safety procedures are in place.

### Option 3: All Hoists

This comprehensive session covers lever, manual, and powered hoists, usage and safety.

## Chain Hoist Equipment Safety Check (CHES Check)

This session is specially designed for Safety Personnel, Tool Crib Attendants, and Maintenance Personnel ensuring the correct practices for pre-use inspections of manual or powered chain hoists are followed.

## Repair Demonstration Clinic (RDC)

This hands-on session will give you all the knowledge you need to comfortably inspect, repair and test Kito ever, manual, and powered chain hoists.
