TCK

AIR POWERED HOIST

The hoist that just keeps going.

With 100% duty rating, fine feathering controls, and reduced noise levels, there's no question the TCK will meet all your production needs. Smooth starts and stops with variable-speed operation provide extremely accurate load positioning and control, and the high speed lifts are guaranteed to improve efficiency.

1 Unlimited Duty Cycle

Continually operate the hoist without worrying about damage from too many starts per hours, so you can get the work done on your schedule.

2 Very Fine Feathering Control

The spring-loaded, multi-vane motor design allows you to place and position a load exactly where you need it. Gradually control the lift with the very fine feathering movements both up and down, even at low speeds.

3 Reduced Noise Levels

Achieve quiet operation and dampened noise levels with the external muffler. The airtight body contributes to its comfortable noise levels and efficient use of air. 82 dBA and below.

4 Pipe-Away Exhaust

No need to worry about oil spatter - direct your exhaust anywhere that best suits the application, including outside or to another room.

5 Easy Top Hook Installation

Quickly remove the top hook for any lug mount application by simply removing the pin and sliding the hook out. No disassembly of hoist body required.

6 Faster Lifting Speed

Keep production moving with faster lifting speeds (up to 37 ft./min in an unloaded state) and the unlimited duty cycle.

7 Strong Against Foreign Materials

With a brass on aluminum bushing and spool combination, there is a greatly reduced risk of seizing in case moisture or foreign materials enter the hoist.
